## **Retrieve Your WebQuote**

Ready to pay for your order online and get the 15% WebQuote discount?

Simply [Click here to retrieve your WebQuote](#) and you will be redirected to the checkout page.

On receipt of your order the film is pre-cut to 20 millimetres over size and shipped to you ready for installation. The film installer is advised of your job and will call you to schedule a suitable day and time for the film installation. You pay the installer the quoted amount for installation on job completion.

## **Comparing Quotes? Make sure the Film is Energy Rated**

The proposed introduction of Mandatory Disclosure legislation will impact your property value if the window film is not WERS energy rated. Smart Films performance data has been independently tested and verified in USA and WERS rated in Australia, so you can be sure the data is true. The Housing Industry Association has recently warned homeowners to be alert to product suppliers making unsupported energy efficiency claims. Regretably, scammers are charging high prices for unrated films. Don't become the next victim. If you are offered an unrated film be aware that Tintplus has unrated ECONomy films at only \$25m2 (even less with WebQuote).

## **FREE Car Tint**

To promote the Windows Energy Rating Scheme (WERS), and encourage customers to check if the film offered is WERS, Tintplus is currently offering customers a FREE car tint.

**What's the deal?** If you get a written quote on a WERS rated film that is less than the Tintplus price for a comparable Smart Film then Tintplus will match the competitor price and reward you with a FREE car tint at our Mansfield workshop (check website for conditions). This offer is strictly limited to first 20 customers.

## **Thank you for using Tintplus WebQuote!**

Thanks again for using our online job costing service. If we can be of any assistance please feel free to contact us via the details below. We would love to have a chat with you about the best film your job.

Kind Regards,
