

Made in USA

ClearView Blue *Technical Specifications* **IGDB ID: 1722 ⁽¹⁾**

The Clearview Blue film is a very pale blue toned film that is suited for beach front apartments or pool side settings to enhance the natural beauty of the surroundings.

Visible Light Transmission	62.1%
Visible Light Reflectance	17.2%
Ultraviolet Light Transmission	<1%
U-Value Summer	4.97
Solar Heat Gain Coefficient	0.53
Shading Coefficient	0.61
Infrared Rejection	62.5%
Solar Energy Transmission	43.7%
Solar Energy Reflectance	23.6%
Solar Energy Absorption	32.7%
Total Solar Energy Rejected	47.0%

Substrate

Mitsubishi N5 Series
Toray U60

Thickness

1.5mil

Method of Coating

Spectra-Select Sputter Coating

Hard Coat

Patented scratch resistant coating designed to meet the most exacting performance standards.

Warranty

Residential: Non-transferable Lifetime Warranty
Commercial: 10 Years

NOTES (1) IGDB is the International Glazing Database maintained by the US Department of Energy. As a consumer protection all performance data and energy efficiency claims must be independently tested and verified before a product can be listed on the IGDB.

The Building Code of Australia requires that new buildings in Australia achieve minimum energy efficiency standards and uses the Windows Energy Rating Scheme (WERS) to rate the performance of glazing and window films. Window films must be listed on the IGDB to obtain a WERS in Australia.

* Solar Specifications testing performed on film mounted to 3mm clear glass. Test, equipment and methods according to ASTM, ANSI and NFRC standards. Calculations performed using US Dept of Energy Lawrence Berkeley Lab's "Windows 5.2" program. Values expressed hereof are typical and for comparative purpose only. Performance data will vary with processing conditions.
